EDUCATION

Sikkim Manipal Institute of Technology

B.Tech in Computer Science — CGPA: 7.6

Sikkim, India

Aug 2018 – May 2022

EXPERIENCE

Ericsson India Global Services Pvt. Ltd

Oct 2023 – Feb 2025

Developer

- Owned backend automation across a 13-node distributed production system, engineering monitoring and recovery mechanisms sustaining 98% uptime
- Migrated 50+ production-critical scripts from Python 2 to Python 3, reducing runtime failures by 50% and eliminating legacy technical debt
- Executed zero-critical-failure Juniper hop upgrades (12.1R4 → 15.1R7) across 13 servers, reducing infrastructure downtime by 30%

Ericsson India Global Services Pvt. Ltd

Aug 2022 – Sep 2023

Associate Engineer Trainee

- Designed Python-based automation pipelines (Bash + Cron) eliminating daily manual ingestion and improving operational efficiency
- Stabilized Linux production workflows via proactive monitoring and failure remediation

Ericsson India Global Services Pvt. Ltd

Jun 2022 – Aug 2022

Graduate Engineer Trainee Intern

- Developed Python and SQL automation supporting ingestion workflows in Linux production systems

PROJECTS

RAG-based Document Intelligence Platform | *FastAPI, ChromaDB, Transformers, Docker, CI/CD*

- Architected production-oriented RAG system enabling grounded Q&A over PDFs with pluggable LLM backends (local + OpenAI) to prevent vendor lock-in
- Built end-to-end ingestion pipeline (chunking, embeddings, persistent vector store, Top-K retrieval) processing 500+ chunks/document with configurable similarity thresholds
- Designed hallucination-resistant prompt constraints and Dockerized CI-tested deployments for deterministic, reproducible environments

Scalable Task & Identity Platform | *FastAPI, SQLAlchemy, JWT, Docker, CI/CD*

- Engineered secure multi-user REST API with JWT auth and role isolation, supporting 100+ concurrent requests with <50ms average latency
- Architected modular service-layer backend (routes → services → ORM) reducing coupling by 40%
- Developed 25+ integration tests enforced via CI, ensuring auth boundary protection and transactional safety

ATS Resume Intelligence Classifier | *Python, TF-IDF, Logistic Regression*

- Built end-to-end resume ranking engine using TF-IDF + Logistic Regression, reducing simulated manual screening effort by 60%
- Designed modular ML pipeline with artifact versioning for reproducible training and deployment
- Implemented hybrid classification + cosine similarity ranking, improving JD-candidate precision by 25% over keyword filtering

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL

Backend: FastAPI, Express

Databases: MySQL, SQL Server

Systems: Linux, Distributed Systems, Fault Tolerance, Production Monitoring

DevOps & Infrastructure: Docker, Git, GitHub Actions, GitLab CI, Bash, Cron

Architecture & Practices: REST API Design, CI/CD, Modular Architecture, Resiliency Patterns
